Proceedings of the VIII-th International Conference on Finsler Extensions of Relativity Theory / Eds.: Pavlov D.G., Bogoslovsky G.Yu., Panchelyuga V.A. – Moscow, Buki Vedi, 2012 – 106 p.

ISBN 978-5-4465-0006-2

The book presents the proceedings of the VIII-th International Conference on Finsler Extensions of Relativity Theory (FERT-2012) which took place during June 25th–July 1st, 2012 in Moscow and Fryazino, Russia. This Conference continues the series of Conferences held annually since 2004: Moscow, Russian Federation (2004, 2007); Moscow–Fryazino, Russian Federation (2009, 2010); Cairo, Egypt (2005, 2006, 2008); Brashov, Romania (2011). The main topics of the FERT-2012 cover the following areas: the Rashevskii polymetric geometry; symmetries of Finsler spaces; Finsler metric functions and their spaces; polylinear symmetric forms of n vectors as Finsler extensions of scalar product; linear Finsler spaces and their connection with hypercomplex numbers; isometric and conformal transformations of Finsler spaces; Finsler spaces and n -ary operations; Finsler extension of relativity theory; algebraic fractals; experimental investigations and astrophysical observations designed to detect possible evidence for the anisotropy of real Space-Time.

CONTENTS

Organizing committee	6
Scientific committee	6
Conference programme	7
Pavlov D.G. Hyperbolic fields: basic properties and perspectives of applications	20
Pavlov D.G., Kokarev S.S. Elements of the theory of functions of a polynumber variable	22
Panchelyuga V.A., Panchelyuga M.S. Research of hyperbolic field space-time effects	23
Shnoll S.E. Cosmophysical factors in random processes	26
Bogoslovsky G.Yu. Inversion of the preferred direction and the corresponding changes in the group of isometries of the axially symmetric Finslerian space-time	28
Garasko G.I. Staircase representation of nondegenerate polynumbers	32
Balan V. Spectral theory and generalized convexity advances in the M -root framework	36
Bulyzhenkov I.E. Internal energy changes can vary GR geodesic curves ..	38
Vladimirov Yu.S. Binary geometrophysics and Finsler geometry	39
Brandt H.E. Differential geometry of Finsler-spacetime tangent bundle	41
Zhotikov V.G. On the geometric interpretation of the principle of gauge invariance	43
Munteanu Gh., Aldea N. New candidates for a Hermitian approach of gravity	45
Mornev O.A. Double numbers in the setting of higher dimensions	46
Solovyov A.V. On volume elements in pseudo-Finslerian spaces with shimada-type metrics	48

Miron R. On the Finslerian mechanical systems	49
Taha E.H. On Finslerized parallelizable spaces	50
Galmak A.M. Polyadic operations on the set of spatial matrices	51
Darvas G. Application of the isotopic field-charge assumption to the electromagnetic interaction	54
Dlugunovich V.A., Kurochkin Y.A., Holenkov A.V. Biquaternions, Lorentz transformations and polar decomposition of Mueller matrices	56
Aldea N., Munteanu Gh. A survey of complex Douglas spaces	57
Laptev Yu.P., Filchenkov M.L. Hyper-fast travel over the galaxy due to space-time anisotropic deformation	58
Rowlands P. The null Berwald-Moor metric and the nilpotent wavefunction	60
Perevozchikov N.F., D'yakonov G.I., Pevgov G.N., Sharihin V.F. Registration of high radiation from the electric discharge area in a water stream	61
Ovsiuk E.M., Redkov V.M. Is it possible a Finsler geometrical model of polarized optics (Stokes-Muller and Jones' approaches)?	63
Redkov V.M., Kisel V.V., Ovsiuk E.M. The Lorentz group – the basis of the description of the interaction between bosons and fermions with the pseudo-Riemannian structure of space time	65
Levin S.F. Cosmological red shift: distance scale, isotropy and nonlinearity	66
Glazunov N.M. On Finsler geometries with symmetric metric functions and anisotropic groups	69
Glazunov N.M. About viable einstein models	70
Turbin A.F., Zhdanova Yu.D. The bodies of hypercomplex numbers ...	72
Voicu N. Harmonic and biharmonic mappings of real finsler spaces	74
Galaev S. Contact metric structures of a Finsler type	76
Neagu M., Krylova N., Grushevskaya H. Jet theoretical Yang-Mills energy in the geometric dynamics of 2D-lB-monolayer	77
Petoukhov S.V., Svirin V.I., Stepanian I.V. Matrix genetics, hypercomplex numbers and the rules of long genetic sequences	78
Koblyakov A.A., Petoukhov S.V., Stepanian I.V. Extension of double numbers, Fibonacci-step musical structures and the problems of music creativity	80

Fedorov A.K., Yurchenko S.O. Quaternions and spin tomography	82
Kurakin V.A., Khanukaev Yu.I. On a metric of quaternion field	85
Koryukin V.M. Neutrinos of the universe and quantum theory of gravity ..	88
Kuzub N.M. About alternative identities Cayley algebra	91
Balan V., Grushevskaya H.V., Krylova N.G., Oana A. The Finsler geometry induced by surface phenomena on interphase boundary with amphiphilic molecular layer	94
Balan V., Grushevskaya H.V., Krylova N.G., Oana A. N-ary operations on the set of spatial matrices. The case $n = 3$ is the object of detail consideration	96
Egorov E.I. Change in the fundamental properties of substances under the conditions of electromagnetic field vector potential local variations	97
Bakusheva A.V. On the foliations arising on distributions with Finsler metric	98
Plaksa S.A., Shpakovsky V.S. On logarithmic residue in three-dimensional harmonic algebra with a two-dimensional radical	101
Shakirov Sh.R. Theory of invariants as applied to nonlinear algebraic equations	103
